

RESEARCH INTERNSHIP AGREEMENT

This Research Internship Agreement (“Agreement”) is entered into by and between the Institute for Applied Artificial Intelligence and Robotics, Inc (IAAIR) and Mahule Roy (“Intern”), to define the terms, responsibilities, and expectations of the internship as part of IAAIR’s Applied AI Research Internship Program.

1. Purpose of Engagement

IAAIR’s Applied AI Research Internship Program is designed to provide interns with a hands-on experience in addressing real-world AI challenges, bridging the gap between academic theory and practical research. This program is structured in accordance with the U.S. Department of Labor’s “Primary Beneficiary Test” so that the Intern is the primary beneficiary of the engagement, receiving comprehensive mentorship and professional development.

2. Scope of Engagement

The internship spans a twelve-week period during which the Intern will engage in research projects that are entirely internal to IAAIR. While projects may occasionally be proposed by external supervisors, they will be reviewed and restructured by IAAIR to ensure alignment with the program’s educational objectives and legal requirements. No projects will involve proprietary datasets or interfere with the core business activities of any industry partner.

3. Roles and Responsibilities

IAAIR will assign research projects, define clear objectives, and provide the necessary supervision, infrastructure, and tools (such as GitHub and Overleaf) to support the Intern’s work. The Intern is expected to dedicate agreed hours per week to the internship, attend weekly supervision meetings, and maintain consistent communication via email and official channels. In addition, the Intern must uphold academic integrity and comply with ethical research practices, including a strict prohibition on plagiarism or any form of misconduct. Mentorship is provided through a combination of IAAIR research supervisors, academic advisors, and, where applicable, external supervisors, ensuring that the Intern benefits from around two hours of guidance, including direct mentoring and feedback each week.

4. Confidentiality and Research Ethics

The Intern agrees to maintain the confidentiality of all information designated as confidential by IAAIR or its supervisors. This obligation covers data, models, source

code, research materials, and any other proprietary information. The Intern is further required to adhere to established ethical guidelines, including zero tolerance for plagiarism, data fabrication, or improper use of AI tools. IAAIR reserves the right to terminate the engagement immediately should there be any breach of these standards.

5. Intellectual Property

All intellectual property, code, documentation, algorithms, and knowledge generated during the internship shall be the exclusive property of IAAIR. The Intern may request permission to use portions of their work for academic purposes (e.g., thesis submission), which may be granted in writing by IAAIR at its sole discretion.

6. Affiliation

IAAIR is an independent research institute registered in Tennessee and is not affiliated with any university. If the internship is part of a course or for academic credit, the Intern is solely responsible for securing approval and credit recognition from their academic institution. IAAIR can provide letters, certificates, and evaluation summaries to support the Intern's credit or academic portfolio, as requested.

7. Duration and Termination

This Agreement becomes effective upon signature and remains valid for the twelve (12) week internship period, with extensions considered on a case-by-case basis. Either party may terminate this agreement with seven (7) days' written notice. IAAIR reserves the right to terminate this Agreement immediately, without prior notice, if the Intern breaches confidentiality, intellectual property, or data security provisions; engages in plagiarism, research misconduct, or any form of unethical behavior; fails to fulfill agreed-upon research obligations or milestones; abandons the internship without informing the supervisory team; fails to attend scheduled weekly meetings for two consecutive weeks without prior notice or valid reason; or demonstrates consistently unsatisfactory progress, as assessed by the assigned supervisor. Biweekly progress reviews will be conducted, and if the Intern's progress is not deemed satisfactory by the supervisor during these reviews, the internship may be subject to early termination.

8. Legal Status and Liability

This internship is unpaid, voluntary, and not an employment relationship. Interns are not eligible for employee benefits, wages, or future employment assurances. This internship is designed in compliance with U.S. Federal and Tennessee State Laws, including the Fair Labor Standards Act (FLSA) guidelines on unpaid internships.

9. Governing Law and Dispute Resolution

This Agreement shall be governed by the laws of the State of Tennessee, USA. Disputes shall first be attempted to be resolved through mutual discussion. If unresolved, the matter may proceed to mediation or binding arbitration as agreed.

10. Acknowledgement and Signature

By signing this agreement, the Intern acknowledges having read and understood the terms of the internship and agrees to comply with all responsibilities and policies.
